CORE SKILLS

- **Languages:** Python, TypeScript, SQL
- **Full Stack:** React, Next.js, Node.js, TailwindCSS, Git, FastAPI, Django, Prisma, Redis
- **AI/ML:** LangChain, LangGraph, RAG, Vector Search, Hugging Face, Ollama, TensorFlow/PyTorch
- **Cloud/Databases:** AWS, Docker, PostgreSQL, MongoDB, Qdrant, MLflow, Jenkins

WORK EXPERIENCE

Wipro (ABB) – Project Engineer | Pune, India | Nov 2024 – Present

- **Engineered custom automation scripts (Python/Bash)** to streamline system workflows, **reducing manual monitoring overhead by 30%** and improving deployment infrastructure efficiency.
- **Conducted deep-dive root-cause analysis** on production application failures by **parsing system logs** and **identifying runtime bottlenecks**, contributing to a **25% reduction in mean time to resolution (MTTR)** for critical L3/L4 engineering code fixes.
- **Optimised data workflows and API-level communication** within complex enterprise architectures, ensuring seamless cross-system integration and **improving runtime stability by 15%**.
- Collaborated directly with core development teams to replicate bugs in sandbox environments, contributing to the continuous delivery and optimisation of business-critical systems.

NSArrows Innovations – Data Science Intern | Pune, India | June 2024 – Sep 2024

- **Built a FastAPI + MongoDB** service to extract and structure data from 500+ unstructured PDF documents, **automating manual ingestion workflows and reducing data processing time by 40%**.
- **Developed an end-to-end Python pipeline** for automated video transcription and multilingual voice synthesis across 3+ languages, improving asset localisation efficiency.
- **Designed a semantic search recommendation engine** using Qdrant and MongoDB vector embeddings, increasing search relevance and content discoverability metrics.

KEY PROJECTS

HealthCare Foresights (<https://www.healthcareforesights.com/>) | November 2025 – Present

- **Developed a high-performance B2B SaaS** platform using **Next.js 15**, **React 19**, and **TypeScript** to stream healthcare market research reports featuring secure, gated previews and fluid user interfaces.
- **Architected a production-ready Go (Fiber v2) REST API** leveraging clean architecture principles, PostgreSQL (GORM) for data persistence, and **Redis caching** to optimise endpoint latency.
- **Implemented secure payment workflows** by integrating the **PayPal REST API** with server-side order validation, Redis token caching, and asynchronous background email notifications.
- **Built a secure administrative dashboard** utilising **TailwindCSS** and **ShadCN** for a comprehensive report CMS, robust order management tracking, and real-time sales analytics.

GitTalk (<https://github.com/iamblesalt/GitTalk>) | October 2025 - Present

- **Built a local-first codebase assistant** utilising **React 19**, **React Router v7**, and **FastAPI** to enable intelligent conversational Q&A over cloned GitHub repositories.
- **Parsed multi-language repositories using tree-sitter AST** to generate precise structural chunks, implementing a **high-performance hybrid search engine (BM25 + vector)** with **LanceDB**.
- Integrated Ollama (qwen2.5-coder) locally to orchestrate secure, offline repository reasoning and generation, utilising a SHA-256 incremental re-indexing pipeline to **accelerate scans by 70%**.

MLOps Sandbox (https://github.com/iamblesalt/Kaizen_CLOSED) | March 2024 - August - 2024

- **Packaged a production-grade ML training pipeline** as an installable Python module, incorporating modular preprocessing, strict configuration management, and robust model serialisation.
- **Orchestrated experiment tracking using MLflow**, logging accuracy, F1, AUC metrics, and ROC curves across 4 competing models to optimise versioned artifact management.
- **Served real-time predictions via FastAPI and Flask**, implementing Swagger, Pydantic data validation, and a custom HTML UI, while containerising all microservices with Docker.
- Automated the end-to-end CI/CD lifecycle by engineering Jenkins pipelines triggered via GitHub webhooks, **reducing code-to-deployment time by 60%** on every push.

EDUCATION

- **Post-Graduation Program in Data Science and Analytics** - Imarticus Learning (Pune) (2023 - 2024) (**TIER-2**)
 - **Bachelor's in Business Administration (Computer Application)** Modern College of Commerce & Computer Studies; Savitribai Phule Pune University Affiliated. (2020 - 2023) CGPA - **8.61**
 - **Senior Secondary School** - PDEA's Shri Mhalsakant Vidyalaya & Jr. College. (2018 - 2020) - **55.69%**
 - **High School** - S.P.M English Medium School, Nigdi-Pune. (2007 - 2018) - **69.00%**
-

CERTIFICATIONS AND ACHIEVEMNETS

Udemy

- Python for Data Science and Machine Learning Bootcamp ([link](#))
- Python Data Structures and Algorithms ([link](#))
- Amazon Web Services - Solution Architect ([link](#))

Kaggle

- Beginner Machine Learning ([link](#))
- Intermediate Machine Learning ([link](#))

HackerRank

- SQL Basic ([link](#))
 - SQL Intermediate ([link](#))
-

LANGUAGES

- English (Proficient), Hindi and Marathi (Native), German and Japanese (Novice)
